

RECYCLING FOOD INDUSTRIAL WASTE for sustainable agriculture

From FOOD WASTE to FEED
through our unique FERMENTATION technology

Food shredding and
dehydration system

Shredded and
dehydrated wastes

Fermentation
Processing

Selection of microorganisms

Fermentation technology

Food Factory

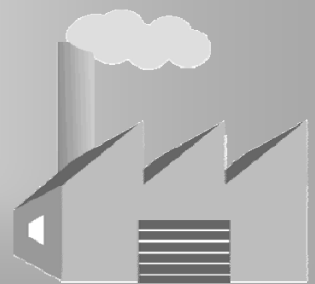

Food waste

ADVANTAGES

- Significant reduction of industrial waste disposal costs.
- Improvement of corporate image.
- Eco-technology sensitive.

Agricultural
Products

Vegetable Farmers

ADVANTAGE

- Establishing profitable relationships with farmers and growers

Disposal of
food waste

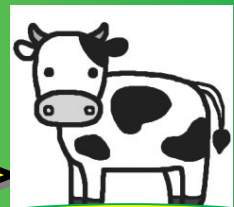

Compost

Stock Farmers

Recycled feed

ADVANTAGES

- Holding down rising grain feed costs.
- Improvement in immune strength of livestock by providing FERMENTED feed.
